Move Complete All settled in our new premises

In our earlier newsletter we informed you that we were 'on the move' to new premises and it is with great pleasure that I now inform you that we're all settled in our new 'home'.

In the early part of last year ATCS had to make a few big decisions as we were running out of space in our old premises. We were in fact victims of our own success – a great dilemma to have - and were finding it increasingly difficult to service our current and new customers in the premises we were in.

As you know we were lucky enough to have an empty purpose built electronics factory on our doorstep and started the move in late December early January. After testing our organisation skills to the limit and much hard work we are now completely settled in our new 40,000 sq ft building, with, I'm pleased to say, minimum disruption to our customers.

To all our customers we would like to say thank you for your patience and understanding during this transitional period and to all our prospective customers we'd like to say come and see our new premises and discuss any potential opportunities that ATC Systems might be able to help you with.

What have you got to lose?

Nancy Morris
Sales & Marketing Executive
