LATEST NEWS – Substantial Investment
Brand New MYDATA 15E Surface Mount Machine
& DEK Horizon 03i Printer

ATC Systems are pleased to announce the purchase of a brand new Surface Mount Machine and Printer due for delivery in the next few months.

Since moving into our new premises we have been researching the best possible machinery to compliment our current plant list and after careful consideration we decided that the MYDATA 15E and Horizon 03i were the most suitable for our requirements and our customers.

The 15E has a high-speed HYDRA ER mounthead that enables high-speed placement of components as small **01005s** and as large as **76 x 66 mm** at speeds up to **21000 cph**. By the use of MYCAM, MYPLAN and MYLABEL software, flexibility, throughput and efficiency is further improved. Change over times will now only take minutes by using Agilis Feeders and off line loading.

The DEK Horizon 03i features cycle times of 12-14 seconds, changeover times in 2 minutes, new program setup in less than 10 minutes, 510mm x 508mm board size accommodation and many other options allowing for an extremely cost-effective in-line screen printing solution.

This is a substantial investment for ATC Systems that we believe will enhance our performance and create greater opportunities to increase our ever-growing customer base. We will continue to strive to improve our services and create partnerships with our customers that are rewarding and financially beneficial to both parties. We are committed to giving a professional service at a cost effective price with quality and on-time delivery being paramount.

The MYDATA 15E and Horizon 03i are the first of many investments in machinery for our new premises and are the first of many improvements we plan to introduce to ensure customer satisfaction and a first class service.

If you require further information on our company and services please give me a call.
