

Great News... We're on the Move!

ATC Systems Ltd are pleased to announce that we are "Moving on Up" – quite literally - just up the road to New Premises.

ATC Systems Ltd have been in the Contract Electronic Manufacture business for over 23 years and have grown considerably during this time. We reached a crossroad last year where our old premises were struggling to cope with the volume of new work we were gaining therefore we decided it was time for a move.

Our new premises have an impressive 40,000 sq ft of floor space and were previously used as an electronics factory by Litton Interconnect and Northrop Grumman. We now have the luxury of four times our previous floor space, which will allow us to introduce new equipment, improve processes and procedures to further enhance our services to our ever-growing customer base.

We would like to extend an invitation for you to visit with us to see our new facilities as soon as we're organised but in the meantime if there are any projects that ATC Systems Ltd can help you with, either now or in the future, please give me a call on 01592 772911.

I look forward to hearing from you.

Nancy Morris

Sales & Marketing Executive
